

## **Marine Microbiology ABIO 598B**

**Instructor: Garriet W Smith Office: 203 SBDG**

**SBDG 200 TTh 6:00-7:15**

**Text: Microbial Ecology of the Oceans, DL Kirchman (ed), Wiley-Liss, 2000**

The course will cover recent concepts concerning marine microbes. We will cover a chapter from your text each week. In addition, I will pass out various handouts with information not covered well in your book (i.e. the Archaea and Actinomycetes, and diseases of marine organisms). Later in the semester, you will do a presentation and a paper on some aspect of marine microbiology (20% of your grade). We will have tests about every three weeks, as we finish major topics. These will count for 60% of your grade, the remaining 10% being the final exam.

**STATEMENT FOR DISABLED STUDENTS:** “if you have a learning or physical disability which might affect your performance in this class, please contact the Office of Disabled Student Services. Once an evaluation has been made, appropriate accommodations will be made.”

**Final Exam Dec.13 8PM**
