## Parts of a Pumpkin

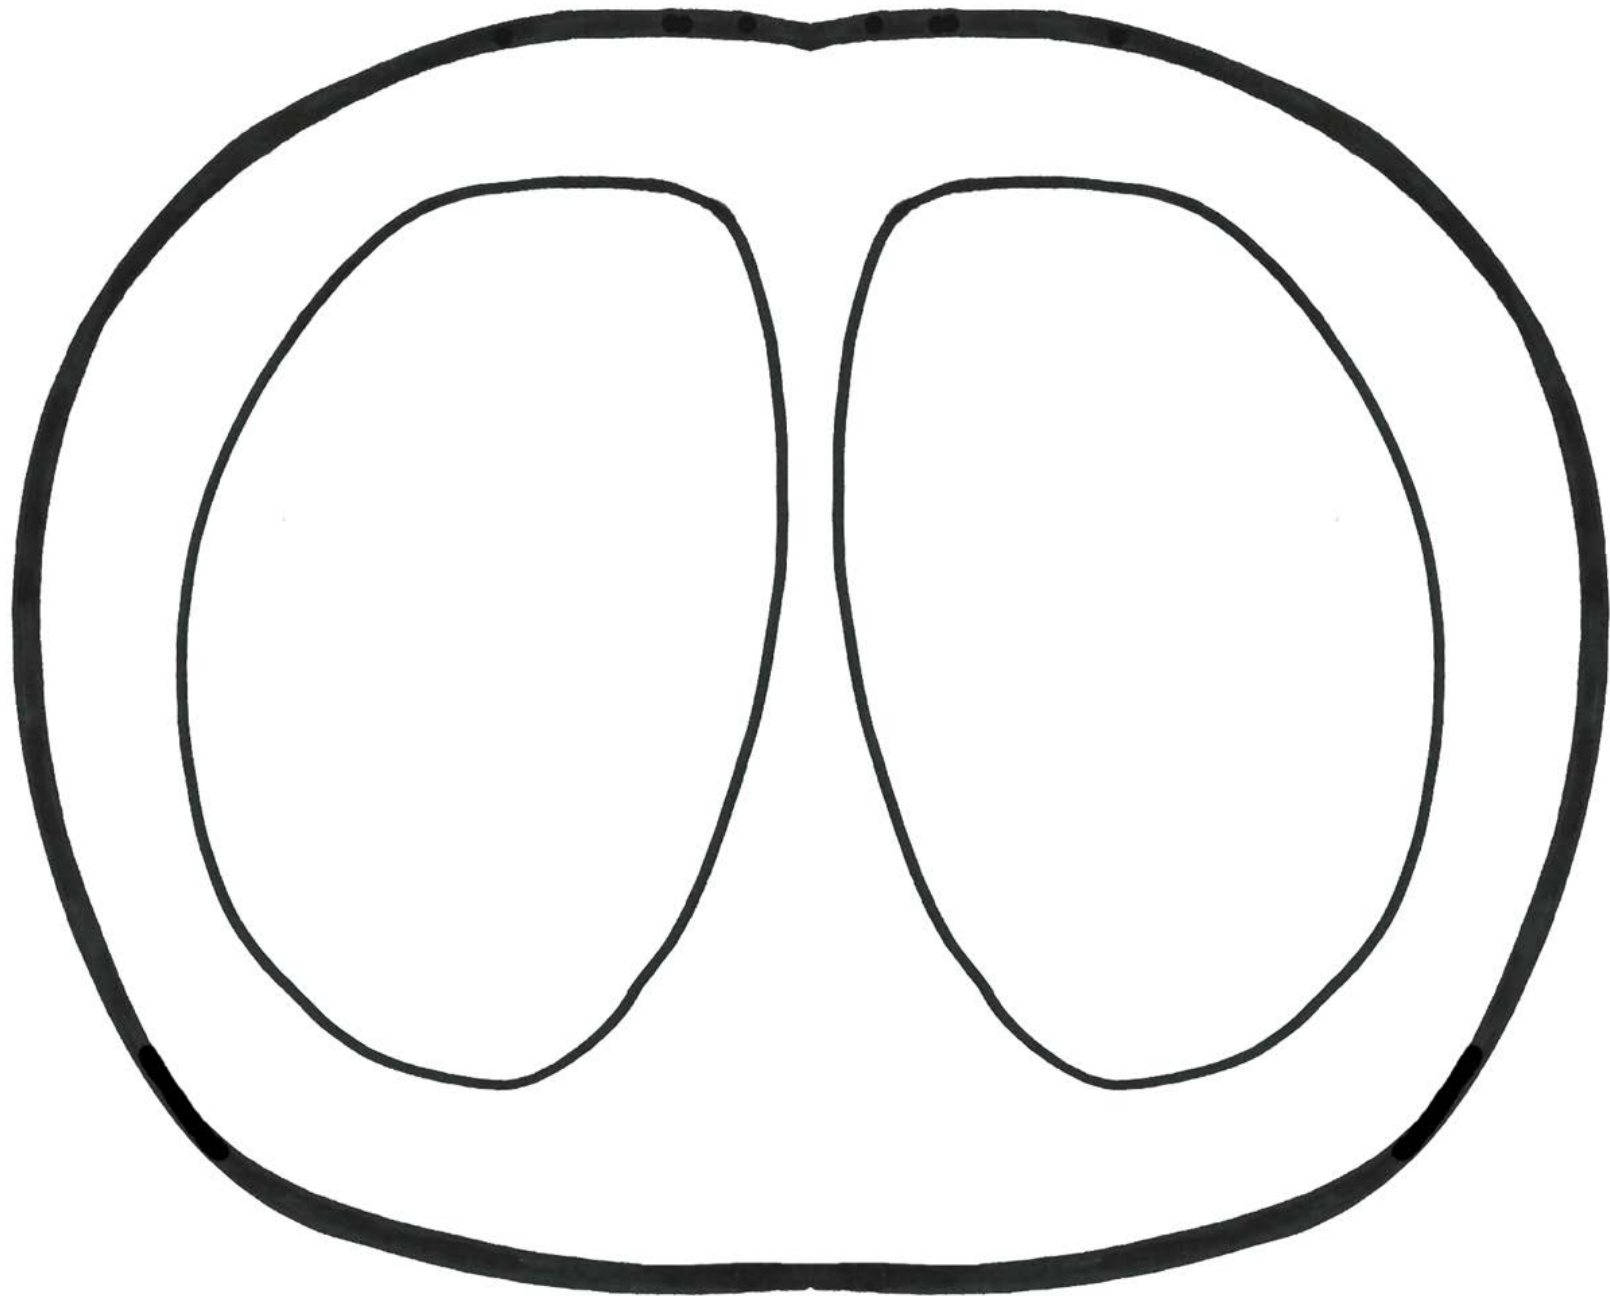

### Materials:

- orange cardstock/ construction paper
- green cardstock/ construction paper
- brown cardstock/ construction paper
- black cardstock/ construction paper
- Parts of a Pumpkin templates
- scissors
- stick glue
- liquid glue
- pumpkin seeds
- orange yarn/ string
- raffia or twine

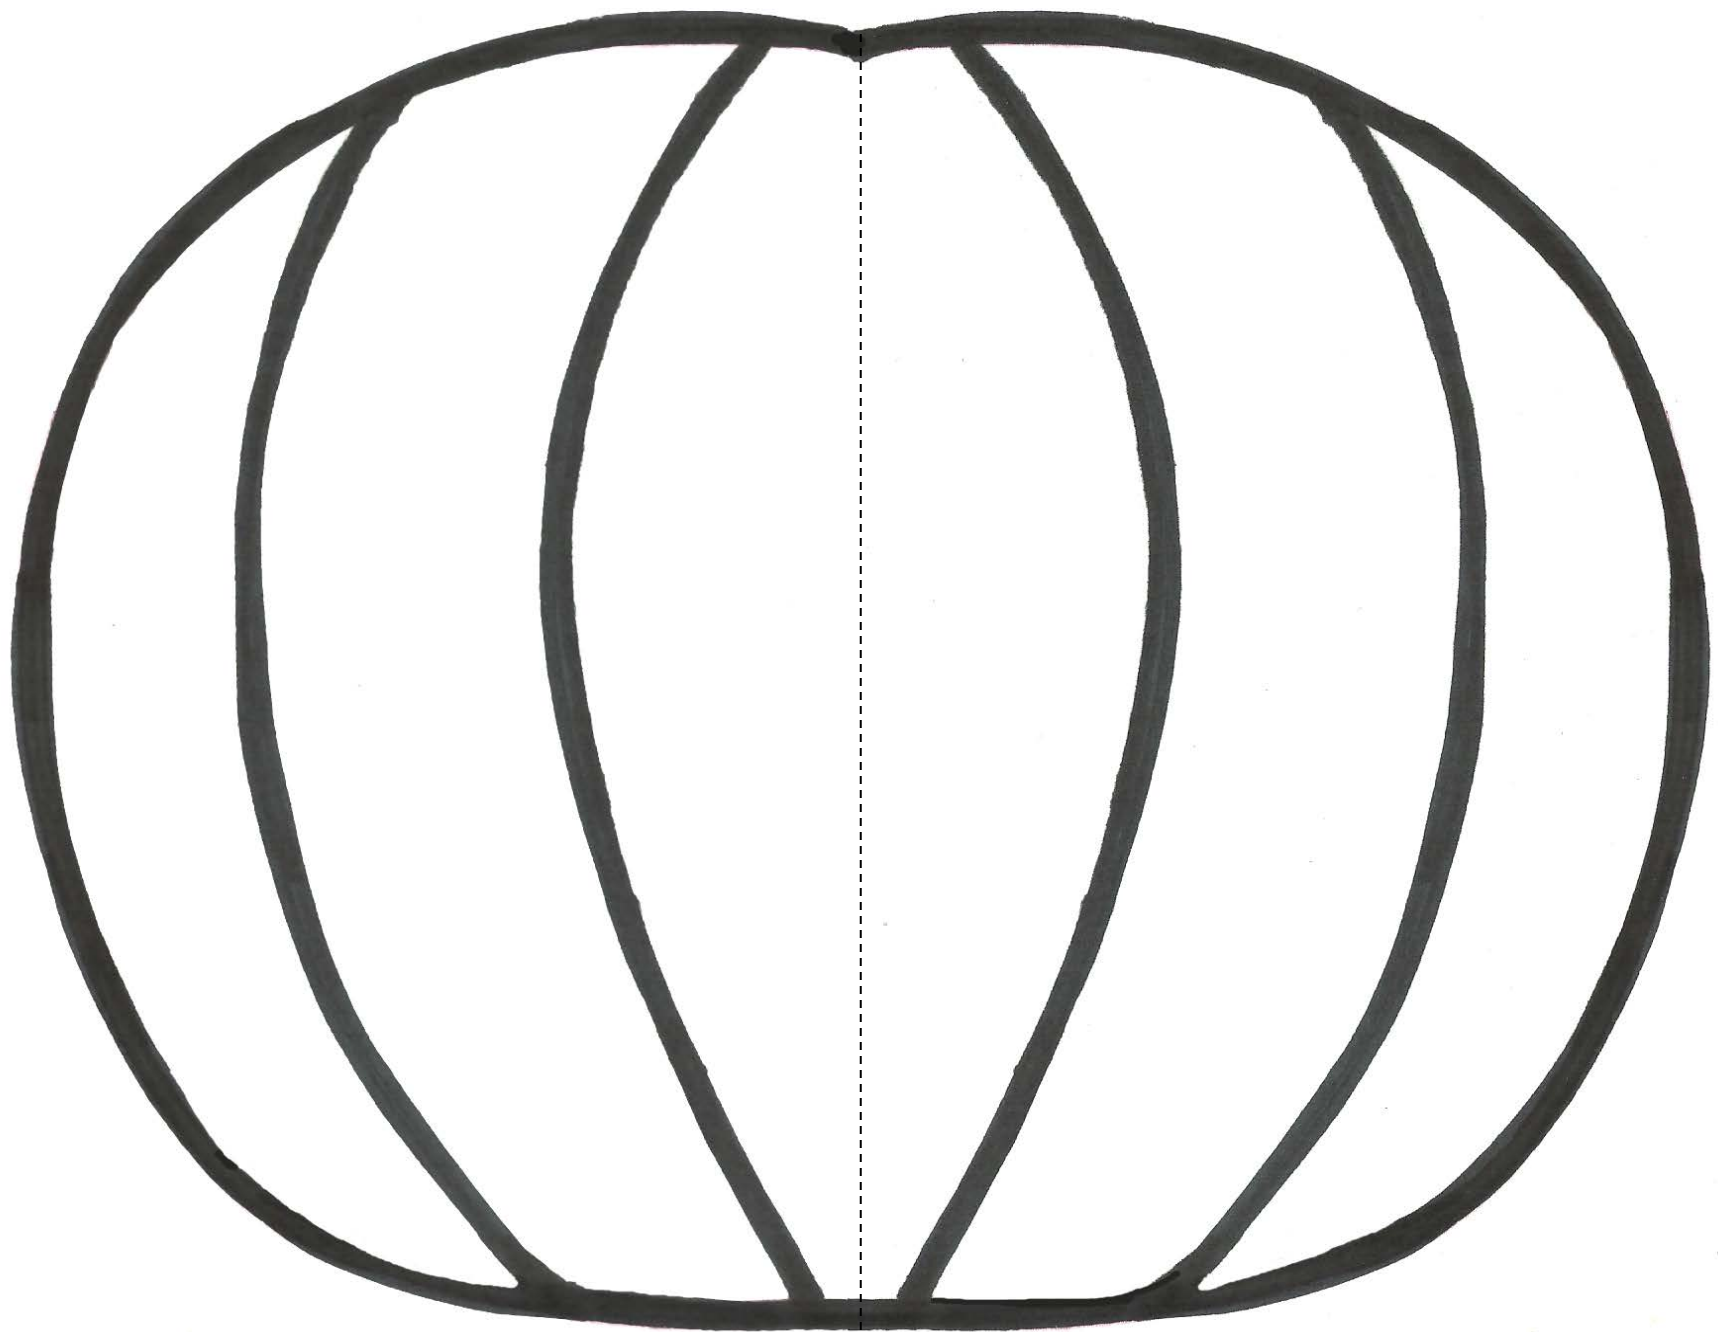

### Directions:

1. Print the two pumpkin templates on orange cardstock/construction paper. Print out the labels onto white paper. Cut out all templates and labels.
2. Turn the black construction paper in the portrait position. Glue the inside of a pumpkin template at the bottom.
3. Cut several strands of orange yarn/string about six inches long. Use liquid glue to glue them into the two circles on the inside of the pumpkin.
4. Use liquid glue to glue pumpkin seeds around and on the orange yarn/string. Allow glue to dry.
5. Cut a small rectangle about 2 inches long and 1 inch wide out of brown construction paper for the stem. Use stick glue to place it on the pumpkin.
6. Cut a small leaf shape about 3 inches long and 2 inches wide out of green construction paper. Use stick glue to place it near the stem.
7. Use liquid glue to add twine or raffia to the stem to create a vine.
8. Cut the outside pumpkin template in two along the dotted center line. Glue each pumpkin half on top of the other pumpkin, only putting glue along the outer sides. The halves open outwards to reveal the inside of the pumpkin.
9. Use stick glue to place the labels on the correct parts of the pumpkin.
