PLANETARIUM PROGRAMS

DEFYING GRAVITY: IT IS ROCKETS SCIENCE  
Months offered: DECEMBER, JANUARY, FEBRUARY & MARCH
Join host Apollo Aurora and her science reporters as they explore the science behind rocket power, gravity on other planets, and even monstrous black holes! Robot experts Apple I-6-8-6 and EGR-1 will also lend a few circuits to explain the force that keeps us humans all grounded. Well, some of the time! Standards: Social Studies S5H8.d

DISCOVERY PROGRAMS

CHANGES MATTER  
Months offered: DECEMBER & JANUARY
Students explore physical and chemical properties of matter. They compare physical and chemical changes and experience reactivity through experiments and “igniting” demonstrations! Standards: S5P1.a, S5P1.b, S5P1.c

CIRCUIT CITY  
Months offered: FEBRUARY & MARCH
Students will utilize batteries, light bulbs, wires, and motorized fans to construct multiple circuits. They will explore the difference between circuits and how electric currents can produce light, heat, sound and motion. Standards: S5P2.a, S5P2.b, S5P2.c

CSI: SOLUTIONS  
Months offered: FEBRUARY & MARCH
Scotty’s dog is missing! Students use chromatography and sifting to separate mixtures; use indicators to make solutions and identify a mystery substance; and examine hair and fiber samples with microscopes in a simulated crime scene investigation. Standards: S5P1.a, S5P1.c

POLYGON PUZZLE  
Month offered: DECEMBER & JANUARY
Students will explore properties of Greek roots of polygons and polyhedrons. Using dynamic computer software called Geometer’s Sketch Pad they will be challenged to solve a puzzle as they construct acute, obtuse, right, isosceles, equilateral, and scalene triangles. Standards: Mathematics MGSE5.G.3, MGSE5.G.4

VARIABLE VENTURES  
Months offered: FEBRUARY & MARCH
Students identify different types of mixtures and work in collaborative teams to make various solutions. They manipulate variables to change the rate of dissolving. Standards: S5P1.a, S5P1.b

VERTEBRATE TAXONOMY  
Months offered: DECEMBER & JANUARY
Students will participate in hands-on taxonomy activities as well as take a look inside the 5 groups of vertebrates using x-ray images. They will interact and observe live animals including salamanders, frogs/toads, turtles, snakes, an alligator, and an owl. Standards: S5L1.a
ECOHIKE IN HITCHCOCK WOODS  
Months offered: SEPTEMBER, OCTOBER, APRIL & MAY
This is a two-hour, two-mile guided hike through Hitchcock Woods. Native plants will be identified, evidence of animal life will be examined, and forest communities will be compared. Standards: SSL1.a, SSL1.b
